# Tourist arrivals up despite crises-Durano

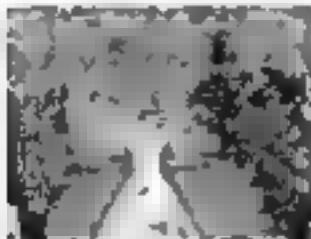

PHOTO BY JIMMY K. LEE FOR THE PHILIPPINE STAR

MANILA (Philippine Star) — Tourist arrivals to the Philippines rose 10.5 percent in the first 10 months of 2007 compared to the same period last year, according to the Department of Tourism (DOT) on Thursday.

The DOT said that the increase was due to a combination of factors, including the recovery of the global economy and the Philippines' reputation as a safe and affordable travel destination.

The number of international tourists arriving in the Philippines reached 10.5 million in the first 10 months of 2007, up from 9.5 million in the same period last year.

The DOT also reported that the number of tourists from the United States and Canada increased significantly, while the number of tourists from the European Union and Japan remained relatively stable.

The DOT said that the increase in tourist arrivals was a positive sign for the Philippine economy, which has been struggling with the effects of the global financial crisis.

# Naida improves hearing abilities

**HEARING LOSS** is a common condition that affects millions of people worldwide. It can be caused by a variety of factors, including aging, noise exposure, and certain medications. While there is no cure for hearing loss, there are ways to improve hearing abilities and manage the condition.

One of the most effective ways to improve hearing is through the use of hearing aids. These devices amplify sound, making it easier to hear. There are two main types of hearing aids: behind-the-ear (BTE) and in-the-ear (ITE). BTE aids are typically larger and are worn behind the ear, while ITE aids are smaller and are worn inside the ear.

In addition to hearing aids, there are also several other strategies that can help improve hearing abilities. These include:

- Protecting your ears:** Avoiding loud noises and wearing earplugs or earmuffs when necessary.
- Managing earwax:** Earwax buildup can interfere with hearing. It's important to keep your ears clean and free of wax.
- Using a soft diet:** Eating soft foods can help reduce the strain on your jaw and neck, which can improve hearing.
- Staying hydrated:** Drinking plenty of water can help keep your ears healthy and improve hearing.

If you're experiencing hearing loss, it's important to see a doctor or audiologist for a proper diagnosis and treatment plan. With the right care, you can improve your hearing and live a more comfortable life.

# Unrivalled rivalry extends to retail

By Chela Jane Peralta

**A**RE YOU READY TO GO TO THE STORE? The question is not just about the store, but about the rivalry between the two major retail chains in the Philippines: SM and J&M.

There has been a rivalry between the two chains since they first opened their doors. SM, which stands for Sogo, and J&M, which stands for J. & M. Inc., have both been successful in the retail industry. SM has a long history of being a leader in the retail industry, while J&M has been a more recent entrant.

Both chains have a wide range of products, from clothing to electronics. They also have a strong presence in the online retail market. The rivalry between the two chains is a testament to the competitive nature of the retail industry in the Philippines.
